

Kevin Nunley

SENIOR FULL-STACK SOFTWARE ENGINEER

Akron, OH

(330) 551-3131 | kevin@kmnunley.com | KMNunley.com | linkedin.com/in/kevin-m-nunley

Senior Full-Stack Software Engineer with 8+ years of experience building and supporting production web applications, APIs, internal tools, and e-commerce platforms, backed by 10 years in IT operations. Combines hands-on front-end and back-end development with end-to-end ownership of architecture, deployment, and production support. Led platform migrations and automation initiatives, including an e-commerce migration that contributed to 120% online sales growth over two years.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS/SCSS, Liquid

Front End: React, Next.js, Vue.js, Tailwind CSS, jQuery, Shopify Hydrogen

Back End & Data: Node.js, FastAPI, Flask, Streamlit, Pandas, Prisma ORM, MySQL, Snowflake, dbt

Platforms, APIs & DevOps: Shopify, Shopify Plus, Shopify Oxygen, REST APIs, GraphQL, Git, GitHub Actions, Docker, AWS, Microsoft Azure, CI/CD, Linux

EXPERIENCE

GM Industrial / Zenex International | Senior Full Stack Developer

Cleveland, OH | June 2024 - Present

- Led the architecture, development, and on-time launch of a Shopify e-commerce platform replacing the company's legacy CIMcloud storefront, owning implementation, data migration, redirects, accessibility, QA, DNS cutover, deployment, and production support.
- Managed launch readiness across 95 Jira issues, coordinating resolution of 87 and reducing the remaining backlog to eight non-blocking defects while establishing intake, prioritization, and cross-functional QA processes.
- Built and maintained a modular Shopify front end using Liquid, JavaScript, Tailwind CSS, metafields, and custom theme components, supported by Git-based workflows and automated CI/CD pipelines.
- Lead the architecture and development of a Shopify Plus B2B distributor portal and serve as the primary technical contact for a contractor-led Sage X3 integration, defining data flows, MVP scope, QA strategy, phased beta, and production cutover.
- Built API-driven Shopify and Monday.com integrations with relational data models, authentication, batching, rate-limit handling, and error recovery to automate private-label customer workflows.
- Architected and prototyped a modern analytics pipeline using Fivetran, Snowflake, and dbt Cloud, evaluating platform alternatives and modeling usage, scalability, and operating costs to guide the company's data strategy.

Chaos Theory Software & Design | Independent Full-Stack Developer

Green, OH | October 2022 - June 2024

- Diagnosed and resolved a production defect in a Vue.js application by tracing state and data flow across front-end, API, and relational database layers, restoring intended system behavior.
- Modernized Makesy's Shopify theme deployment workflow by integrating Shopify with GitHub and implementing a GitHub Actions CI/CD pipeline, replacing manual theme uploads with an automated, version-controlled release process.
- Conducted a WCAG 2.0 accessibility audit of Makesy's Shopify storefront, documented remediation priorities, and implemented fixes across Liquid, JavaScript, and CSS that did not require visual redesign.
- Built internal accounting and operational reporting applications for TMN Enterprises using Python, Streamlit, and Pandas, automating manual data-processing workflows and improving visibility into business performance.

Summersalt LLC | Software Engineer

Remote | November 2021 - September 2022

- Collaborated with UX/UI designers and a remote engineering team through sprint planning, pair programming, and pull-request reviews to deliver production Shopify features using Liquid, JavaScript, HTML, and SCSS, including custom navigation and reusable modules for promotional and collection pages.
- Built a reusable Shopify personalization section using Liquid and JavaScript that captured UTM parameters or HTTP referrers in a first-party cookie and dynamically displayed campaign-aligned content across the storefront, reducing the need for dedicated promotional landing pages.
- Established a version-controlled Shopify release workflow by integrating Shopify themes with GitHub and implementing a GitHub Actions CI pipeline, replacing direct theme uploads with an automated deployment process.
- Researched and developed a headless-commerce MVP using Shopify Hydrogen and Oxygen, evaluating the architecture as a potential direction for the storefront.
- Reconfigured third-party analytics pixels and tracking tags in Google Tag Manager (GTM), implementing privacy-specific behavior across the Shopify storefront.

Murdock Industrial Inc. | Lead IT Technician (E-commerce Development & Operations)

Akron, OH | July 2018 - September 2021

- Led Murdock Industrial's migration from Magento to Shopify and configured Fishbowl ERP's built-in connector to synchronize products, inventory, customers, and orders, contributing to 120% online sales growth over the following two years.
- Designed and implemented a Python shipping-rate engine integrated with Shopify for bulk hose orders, modeling reel capacity from hose dimensions, length, bend radius, and reel specifications to calculate shipment size and weight, provide shipping quotes during checkout, and eliminate manual sales follow-up.
- Independently built and launched Proximat.net on Shopify, owning theme development, product catalog configuration, third-party integrations, and ongoing storefront operations for a new e-commerce venture.
- Served as the company's sole developer and technical owner for its e-commerce systems, maintaining multiple Shopify storefronts, Fishbowl ERP, integrations, and supporting infrastructure while delivering new applications and production fixes.

DRB Systems LLC | Technical Support Representative III

Green, OH | May 2015 - March 2018

- Provided advanced support for integrated point-of-sale software, hardware, and equipment-control systems, diagnosing complex production issues and mentoring other technicians.

Springfield Local Schools | IT Technician

Akron, OH | October 2010 - May 2015

- Supported hardware, software, and infrastructure serving more than 5,000 students and staff, including device deployment, troubleshooting, and technical training.
