Professional Overview

GM Industrial; Cleveland, OH   2024 - Present
Web Developer / Designer

Led the design, development, and deployment of a new eCommerce website on Shopify, implementing key features to enhance user experience and ensure a robust technical foundation. Managed version control, conducted code reviews, and maintained development workflows following Agile principles. Collaborated with an external digital marketing team, ensuring seamless integration of their design and development contributions. Focused on optimizing site performance, usability, and reliability while maintaining clean, scalable, and maintainable code.

- Developed and deployed a new eCommerce website on Shopify from the ground up.
- Designed and implemented core website features for performance and usability.
- Managed version control and conducted code reviews to ensure code quality and maintainability.
- Led Agile-based development processes to streamline workflows and enhance collaboration.
- Worked closely with an external digital marketing team to integrate their contributions effectively.

Chaos Theory Software & Design; Akron, OH
Independent Contractor

Consulted on web accessibility practices, development pipelines, and web development projects specializing in eCommerce websites.

Makesy Inc (May - June 2023)

- Audited web accessibility and consulted leadership on opportunities for improvement and ongoing development
- Revamped web deployment pipeline to facilitate code maintainability and better CI flow
- Several bug-fixing projects relating to front-end features

Summersalt LLC; St. Louis, MO   2021 - 2022
Software Engineer   (Covid-19 Related Layoff)

Plan, develop, and deploy engineering projects for the company's eCommerce website including front-end customizations, back-end services, and bug fixes. Work closely with marketing teams to facilitate new product launches and campaigns. Support ongoing site maintenance including accessibility features, reducing technical debt, and refining deployment strategies.

- Developed Shopify storefront and back-end infrastructure leveraging Liquid, HTML/SCSS, Javascript, jQuery, React, NodeJS, etc.
- Lead DevOps initiatives to streamline continuous deployment strategy and standardize procedure, tooling, and testing.
- Automated development workflows reducing engineering overhead and turnaround time.

Murdock Industrial Inc; Akron, OH   2018 - 2021
eCommerce Developer & IT Manager

Sole developer working with stakeholders on eCommerce tech stack including front-end and back-end engineering, as well as internal software tooling and development. IT manager working with external vendors and contracted technicians to achieve timely repairs and minimize crucial infrastructure outages.

- Developed Shopify Web Applications leveraging the Shopify API, Shopify App Bridge, Shopify Polaris
- Planned, designed, implemented, and maintained website UX features including front-end theme customizations via Liquid, HTML, Javascript, CSS, and back-end tooling to connect and maintain various microservices
- Developed internal desktop and web applications using Python, JavaScript, Flask, NodeJS, ReactJS

DRB Systems Inc; Akron, OH   2015 - 2018
Technical Support Representative, Level 3 (Senior)

- Assist and trained customers in using DRB System's software products.
- Analyzed technical issues and completed timely troubleshooting to solve issues over multi-line telephones and emails.
- Researched and completed project assignments based on customer needs.
- Mentored mid-level and junior technicians assisting with difficult tasks
- Resolved hardware and software issues related to car wash equipment and point-of-sale systems
- Escalated complex issues to appropriate departments for resolution

Springfield Local School District; Akron, OH   2010 - 2015
IT Technician

In this position, current students or recently graduated students are put through the Technical Work Experience program. Students learn how to repair computers and other technology, as well as learning how to network.

- Supported and maintained IT infrastructure for a school district with over 5,000 students and staff
- Installed and configured hardware and software for desktop and mobile devices
- Provided technical training and support to faculty and staff

Education
